

Harborview POA

Front Gate Call Box Telephone Keypad Guest Entry Application

A telephone keypad is installed at the front gate which allows your guests/deliveries to ring your phone so you can activate the front gate. When a guest/delivery arrives, they will scroll through the keypad to find your name and press the call button. This will ring your phone listed in the call box. When you answer, if you wish to let them in, press 9 on your telephone and hang up. This will activate the gate to allow entry.
